

With JMark's industry leading-quality products, you'll reduce hazardous waste, save water, and save money. Over our 40+ years of business and expertise, we have refined our process down to a science. We will collaborate with you to carefully evaluate your system's specific needs. We guarantee the reliability and function of our equipment and will be there to answer questions every step of the way.

APPLICABLE INDUSTRIES

- Aerospace
- Electronics
- Metal Finishing
- Automotive
- Power Generation
- Petrochemical
- Food & Beverage
- Pharmaceuticals
- Mining
- Textile

Used to remove:

- Fine suspended solids
- Heavy metals
- Chlorine

JMS – Media Filter

100-400 GPM

FEATURES

- Robust design for performance, durability, and reliability in industrial applications.
- Fully integrated skid mounted system.
- Shipped ready for install and start-up with minimal labor.
- Fully automated and highly water efficient backwash system
- Removes suspended solids to 5 microns.
- Low maintenance.
- Easy to operate.
- Long life span.
- UL approved available.
- Custom sizes available (Other standard sizes: 2-25 gpm, 25-50 gpm, 50-100 gpm)
- Made in the USA.

• Design max GPM = 400+ GPM

SPECS

• Design suspended solid removal = down to 5 microns
